

[Requests during Visitation]

1. We ask that you check your body temperature when visiting as well as every day during extended visits. (If you own a thermometer, please bring it with you. If you forget one, it is possible to check your temperature at the LaMer office.)
2. In the event that conditions change during your visit, usage may be suspended.
3. Please comply with the following safety preservation measures established independently by LaMer.
 - Indoors, wear a mask as a general rule, and do your best to avoid mutual close contact and conversations. When it is necessary to converse, be sure to wear a mask.
 - Frequently wash your hands using soap and disinfect with alcohol. Also, remember to disinfect doorknobs and other places that people touch, such as research equipment, etc., with alcohol.
 - As much as possible, ventilate rooms once every 30min for around 5min at a time by opening at least two doors or windows.
 - Finish laboratory work in as short of a time as possible.
 - Limit research activities conducted within a single room (faculty rooms, small conference rooms, etc.) to no more than three people, and be sure to practice social distancing. For larger rooms, apply these standards with the area ratio as a guide.
4. In the event that you suspect that you have contracted COVID-19 during your visit, or in the event of any other health-related problems, please promptly inform the acceptance staff and the LaMer office. For specific measures, please see the following file and website.

Ehime University: "What you can do to prevent the spread of infection"

<https://hoken.hsc.ehime-u.ac.jp/news/2020/05/11/aafa52a8eb6d204e8ce90027cee4bef489cb71b1.pdf>

Ehime Prefecture: "Information on consulting services relating to novel coronavirus infection (COVID-19)"
